

## Doctoral student in Supply Chain Management

WE OFFER A FULL-TIME POSITION AT THE SOLVAY BRUSSELS SCHOOL OF ECONOMICS AND MANAGEMENT

### Job description

The Solvay Brussels School of Economics and Management (ULB) has currently a phd position available in the area of supply chain management. The overall topic of the PhD is risk management in covid-times, linked to supply chain management and operations management. The PhD track enables a fast track PhD as there are limited teaching obligations in the first two-years (there is already full-time funding for the first two years) based on an FNRS funding. The PhD is guided by Professor Dr. Evelyne Vanpoucke. The successful applicant will join the SBS-EM, characterised by a remarkable track record in research excellence.

### Doctoral program

Our school consists of a vibrant mix of people interested in economics and management. We actively strive to create and maintain an intellectually stimulating environment, advancing the scientific knowledge in the areas mentioned above, while at the same time contributing to the development of effective practices for companies, organizations and society. Our school is highly recognized, both nationally and internationally.

The Ph.D. studies also involve advanced training (in French: “formation doctorale”) that helps Ph.D. candidates acquire the necessary tools and knowledge to carry out independent research. At SBS-EM, this training is organised in “tracks”, which correspond to different areas of specialisation: Management Science, Economics and Economics & Statistics. Each track has its own requirements. Tracks are hosted in research centers, which also provide administrative and logistical support for their doctoral students. As of today, about 100 doctoral students are enrolled at SBS-EM. SBS-EM is part of the Graduate School in Economics (all universities in French-speaking Belgium + KU Leuven) and the Ecole Doctorale Thématique en Sciences de Gestion (ULB - U. Mons – HEC Liège) which pool the offer of advanced courses across the member universities. All registered Ph.D. students at SBS-EM have access to these courses.

### Profile

Required Qualifications and skills for the position:

- Master Degree in Management/business engineering or related field (a two-year master degree) with graduation date in the last three years

- a clear interest in supply chain /operations management
- outstanding academic performance
- a research mind-set and good analytical skills
- Interested in research relevant to both the academic and the business world
- Have good writing skills and fluent in English
- a pro-active attitude
