

Production of metals

Lecturers

Marie-Paule DELPLANCKE (Coordinator) and Annick HUBIN

Course mnemonic

CHIM-H417

ECTS credits

3 credits

Language(s) of instruction

English

Course period

Second term

- > In-depth knowledge and understanding of exact sciences with the specificity of their application to engineering
- > The flexibility and adaptability to work in an international and/or intercultural context
- > An integrated insight in chemical process and materials' technology
- > Insight in chemistry as a link between process and materials technology

Evaluation method(s)

Other

Teaching method and learning activities

Contribution to the teaching profile

This teaching unit contributes to the following competences:

Programmes

Programmes proposing this course at the Brussels School of Engineering

MA-IRMA | Master of Science in Chemical and Materials Engineering | finalité Professional/unit 1
