- 2: The different status of French
- 3: The different varieties of French
- 4: Languages in contact and diglossia
- 5: A history of French language
- 6: A history of French lexicon

## Objectives (and/or specific learning outcomes)

The course in "History of the French language and French speaking areas" aims to trace the external history of French, in other words the story from the outside, and light its conditions of emergence and expansion, while familiarizing students with all theoretical concepts that the this story involves. It combines the desire to understand what the French language is strictly to the desire to construct an image of the French language as fully as possible, using a large number of sources and sources of the greatest variety, regularly stimulating a critical distance from the sources that History provides us with.

## Teaching method and learning activities

Theoretical bases : lectures with multimedia support
