Aircraft performance and stability

Lecturer

Axel Coussement (Coordinator)

Course mnemonic MECA-H506

ECTS credits 4 credits

Language(s) of instruction English

Course period First term

Pre-requisits and co-requisits

Pre-requisites courses

MECA-Y405 | Damage testing in aeronautics | 3 crédits

Teaching method and learning activities

Contribution to the teaching profile

This teaching unit contributes to the following competences:

- > In-depth knowledge and understanding of exact sciences with the specificity of their application to engineering
- In-depth knowledge and understanding of the advanced methods and theories to schematize and model complex problems or processes
- > Reformulate complex engineering problems in order to solve them (simplifying assumptions, reducing complexity)
- > Correctly report on research or design results in the form of a technical report or in the form of a scientific paper

- > Collaborate in a (multidisciplinary) team
- > A creative, problem-solving, result-driven and evidence-based attitude, aiming at innovation and applicability in industry and society

MECA-H506 | 2023-2024

- > A critical attitude towards one's own results and those of others
- > The flexibility and adaptability to work in an international and/ or intercultural context
- > Has an in depth scientific knowledge, understanding and skills in at least one of the subfields needed to design, produce, apply and maintain complex mechanical, electrical and/or energy systems;
