Second term

Course content

Models of interpersonal communication - Verbal communication - non-verbal communication - space - The systemic model of communication - identity (inter-individual and inter-group approaches) - intercultural communication - rumours and social representations

Objectives (and/or specific learning outcomes)

This course aims at initiating students to social psychological approaches towards communication processes. At the end of the course, students should be familiar with the main bases of the social psychology of communication, to be able to apply them in analysing real communication situations, and to find their way in the literature of the field.
