

Conception et gestion de banques de données

Lecturer

Frédéric SERVAIS (Coordinator)

Course mnemonic

STIC-B505

ECTS credits

5 credits

Language(s) of instruction

French

Course period

First term

Course content

Content Study of formalisms for representing information (with emphasis on the entity-relationship and relational models) and of their application to building and using information systems. Discuss recent evolutions in the light of the widespread availability of databases and web usage. Build hands-on experience with a software tool for assisting database designers

Objectives (and/or specific learning outcomes)

Goal Gain familiarity with (1) a conceptual view of databases and information systems, emphasizing information content from a user point of view rather than the physical representation of data or the construction of complex application programs, and (2) the methodology for designing information systems.

Pre-requisites and co-requisites

Pre-requisites courses

STIC-B405 | Introduction aux bases de données | 5 crédits, STIC-B450 | Algorithmes et programmation I | 5 crédits and STIC-B455 | Algorithmes et programmation II | 5 crédits

Teaching method and learning activities

> Theoretical lessons - Exercises - Project follow-up sessions

References, bibliography and recommended reading

Bibliography - R. Elmasri and S. Navathe, Fundamentals of database systems, Addison-Wesley, 5th ed., 2007- Jean-Luc Hainaut, "Bases de données - Concepts, utilisation et développement", 2ème édition, Dunod 2012.
