

Transport, mobilités et environnement

Lecturer

Frédéric DOBRUSZKES (Coordinator)

Course mnemonic

TOUR-F407

ECTS credits

5 credits

Language(s) of instruction

French

Course period

Second term

Course content

F. Dobruszkes' part:

1. Introduction
2. From restricted mobilities to 'excessive' flows
3. Regulations, mobilities and environment
 - 3.1. The Liberalisation of the European air transport
 - 3.2. Economic integration, free trade and increase in freight transport
 - 3.3. Daily and local mobilities
 - 3.4. Local/regional mobilities vs. long-distance mobilities
4. Transport, environment and social inequalities: the air noise case in Brussels
5. Conclusions

Objectives (and/or specific learning outcomes)

F. Dobruszkes' part: introducing cross-relations between transport, mobilities and environment, notably considering tourism. The governmental regulations issue is at the core of these lessons.

M.-F. Godart's part:

For both parts, the teachers aim for students developing their readiness to criticize.

Teaching method and learning activities

Lectures. Debates with/from the students expected.

References, bibliography and recommended reading
