

# Production of metals

**Lecturer**

Annick HUBIN (Coordinator)

**Course mnemonic**

CHIM-H417

**ECTS credits**

3 credits

**Language(s) of instruction**

English

**Course period**

Second term

- > In-depth knowledge and understanding of exact sciences with the specificity of their application to engineering
- > The flexibility and adaptability to work in an international and/or intercultural context
- > An integrated insight in chemical process and materials' technology
- > Insight in chemistry as a link between process and materials technology

## Evaluation method(s)

Other

## Teaching method and learning activities

### Contribution to the teaching profile

This teaching unit contributes to the following competences:

## Programmes

### Programmes proposing this course at the Brussels School of Engineering

MA-IRMA | **Master of Science in Chemical and Materials Engineering** | finalité Professional/unit 1
