

Graduate microeconomics II

Lecturer

Luca Paolo Merlino (Coordinator)

Course mnemonic

ECON-S431

ECTS credits

5 credits

Language(s) of instruction

English

Course period

Second term

Course content

see my web page at <http://plegros.net/content/micro2>

We will analyze environments in which some of the main assumptions underlying the two welfare theorems of general equilibrium are not satisfied: mainly information asymmetries and externalities. The purpose is to introduce and apply concepts or tools from information economics, decision under uncertainty, contract theory and mechanism.

Objectives (and/or specific learning outcomes)

At the end of the course, the students will be able to :

- Chose the appropriate tools to engage in applied or more fundamental work in microeconomics and its applications.
- Analyze environments in which some of the main assumptions underlying
- Understand by modeling an issue what would be the effects

Teaching method and learning activities

Lectures

Contribution to the teaching profile

The course contributes to the developments of the following skills :

- Use data mining and management techniques as well as financial modeling to develop decision, evaluation or management tools
- Comprehensively assess potential solutions using economic, financial and other criteria as relevant to the situation at hand.
- Solve complex problems arising in economic, financial and public policy contexts to transfer knowledge in realistic solutions to operationalize solutions.
