

Physics of Strong Interactions

Lecturer

Laurent FAVART (Coordinator)

Course mnemonic

PHYS-F477

ECTS credits

5 credits

Language(s) of instruction

English

Course period

Second term

Objectives (and/or specific learning outcomes)

Phenomenology of strong interactions starting from experimental measurements and interpreted in terms of perturbative Quantum Chromo Dynamics.

Evaluation method(s)

Other

Programmes

Programmes proposing this course at the faculty of Sciences

MA-PHYS | **Master in Physics** | finalité Research/unit 1 and finalité Teaching/unit 1
