

# Project Electronics and Telecommunication

**Lecturer**

Francois HORLIN (Coordinator)

**Course mnemonic**

PROJ-H415

**ECTS credits**

4 credits

**Language(s) of instruction**

English

**Course period**

Academic year

- › Present and defend results in a scientifically sound way, using contemporary communication tools, for a national as well as for an international professional or lay audience
- › Work in an industrial environment with attention to safety, quality assurance, communication and reporting
- › Think critically about and evaluate projects, systems and processes, particularly when based on incomplete, contradictory and/or redundant information
- › A creative, problem-solving, result-driven and evidence-based attitude, aiming at innovation and applicability in industry and society
- › A critical attitude towards one's own results and those of others
- › Has an active knowledge of the theory and applications of electronics, information and communication technology, from component up to system level.
- › Has a profound knowledge of either (i) nano- and opto-electronics and embedded systems, (ii) information and communication technology systems or (iii) measuring, modelling and control.
- › Is able to model, simulate, measure and control electronic components and physical phenomena.

## Teaching method and learning activities

### Contribution to the teaching profile

This teaching unit contributes to the following competences:

- › In-depth knowledge and understanding of exact sciences with the specificity of their application to engineering
- › In-depth knowledge and understanding of the advanced methods and theories to schematize and model complex problems or processes
- › Reformulate complex engineering problems in order to solve them (simplifying assumptions, reducing complexity)
- › Conceive, plan and execute a research project, based on an analysis of its objectives, existing knowledge and the relevant literature, with attention to innovation and valorization in industry and society
- › Correctly report on research or design results in the form of a technical report or in the form of a scientific paper
