

Surface treatment : processing and analysis

Lecturers

Iris DE GRAEVE (Coordinator) and Tom Hauffman

Course mnemonic

CHIM-H419

ECTS credits

4 credits

Language(s) of instruction

English

Course period

First term

- › Collaborate in a (multidisciplinary) team
- › A creative, problem-solving, result-driven and evidence-based attitude, aiming at innovation and applicability in industry and society
- › The flexibility and adaptability to work in an international and/or intercultural context
- › An attitude of life-long learning as needed for the future development of his/her career
- › An integrated insight in chemical process and materials' technology
- › Insight in chemistry as a link between process and materials technology

Teaching method and learning activities

Contribution to the teaching profile

- › This teaching unit contributes to the following competences:
 - › In-depth knowledge and understanding of exact sciences with the specificity of their application to engineering
 - › Correctly report on research or design results in the form of a technical report or in the form of a scientific paper
 - › Present and defend results in a scientifically sound way, using contemporary communication tools, for a national as well as for an international professional or lay audience
