

Cost benefit analysis of Public Decisions

Lecturer

Filipp Ushchev (Coordinator)

Course mnemonic

ECON-S424

ECTS credits

5 credits

Language(s) of instruction

English

Course period

Second term

Campus

Solbosch

Course content

This module covers the following topics: role of economic analysis in policy, project and policy financing; project cycle and the public sector's involvement; investment and policy appraisal and project selection; alternative evaluation options (e.g. cost effectiveness analysis); valuation of external effects of investments; monitoring and evaluation of policies and projects

Objectives (and/or specific learning outcomes)

Introduce the concepts, theories and tools necessary to conduct a full economic (rather than simply financial) analysis of projects and policies.

Teaching method and learning activities

Combination of theory and case studies to be prepared by students organized in groups

Contribution to the teaching profile

Provides an essential tool for any future economist interested in working for international organizations in financing projects. It is also useful to assess the social impacts of any policy or regulation. Since this is often done by contracts with consulting firms, this tool is also useful for those of you keen on working for consulting firms
