

Bachelor in Medecine

A mandatory entrance exam for the programmes in medicine and dentistry is organised by the French Community of Belgium. It includes a science test based on prerequisites in mathematics, physics, chemistry, and biology, and a humanities test that measures the student's summarising, reasoning, and empathy skills. Only students who pass this exam may enrol in these two programmes.

Programme objectives

Fulfil your ambitions by gaining a grounding in a number of areas including: curative and preventative medicine, out-patients or hospital medicine, workplace medicine or school medicine and laboratory or industrial research.

Programme's added value

During your studies you will develop your powers of critical analysis and your human qualities through regular contact with patients and the many non-medical staff. As well as developing

International/Openness

During your studies you have the opportunity to take part in university exchange programmes, lasting a few months or a whole year. As well as the possibility of taking part in the Erasmus programme, other types of work placements are also on offer, especially in third world countries.

Job opportunities

If you go on to do a Master in Medicine, you could go into the following professions :

- > Doctor of medicine, with one of a number of specialisations depending on the course taken: GP, surgeon, orthopaedist, oncologist, anaesthetist, obstetrician, paediatrician,
- > Director of a hospital or medical centre,
- > Workplace doctor
- > Medical data manager

If you wish to do a different MA, you could move into the following areas:

- > Biomedical Sciences
- > Public Health

You could also move into research in any one of the branches of health: physiology, immunology, genetics, cellular and molecular biology and clinical research (new medicines).

Useful information

The need for medical staff is constantly changing. High-quality medical treatment is being demanded more than ever before.

Despite the measures taken to limit access to the profession, if you are determined and if you have the requisite qualities and the vocation, you will always find a way of making a career in medicine.
