Bachelor in Sociology and Anthropology

Programme objectives

To provide students with the necessary background for taking a master programme based on the discipline traditions of sociology and anthropology. Students will learn ways of analysing various complex social situations using appropriate research methods.

Programme's added value

The bachelor in Sociology and Anthropology provides students with quite an in-depth education in each of these two sister disciplines. The bachelor as a whole provides a good background in languages.

The possibility of exchanges is a priority aspect of any programme. The Department has agreements with more than a hundred partners throughout the world enabling students to spend a semester or a whole year. The opportunity to do a work placement or fieldwork is provided as of master.

Throughout the year we offer:

> Coaching: the department has introduced a coaching programme targeting all students enrolled in the first bachelor year. It is run by a team of assistants. The aim of this coaching is to support students in their first steps at the University and to help them pass their exams:

  > exercise sessions;
  > guidance;
  > the possibility to consult your exam scripts;
  > and our teachers are available at certain times to speak to you and answer your questions.

You will have at your disposal:

> the human sciences library;
> several specialist libraries; the Faculty's computer rooms.
> Website: www.philoscsoc.ulb.be

Succeed in your studies

As indicated by its title, the bachelor in Sociology and Anthropology provides basic education in these two disciplines. However, given the complexity of the subject matter of these disciplines, we also provide a good background in a range of related disciplines providing complementary perspectives: philosophy, history, human geography, demography, statistics, law, psychology, etc. These disciplines are systematically looked at with regard to their relationships to the social sciences.

During the bachelor period, students follow units progressively building up their knowledge of the theory and methodologies used in sociology and anthropology and specific subjects belonging to these two disciplines. Exercises associated with theoretical thinking and fieldwork are organised during the first year. The intention of this programme is to give priority to learning the use of both quantitative and qualitative methodologies in social sciences.

Last but not least, language lessons are provided throughout the programme.
