Bachelor in Sociology and Anthropology

As indicated by its title, the bachelor in Sociology and Anthropology provides basic education in these two disciplines. However, given the complexity of the subject matter of these disciplines, we also provide a good background in a range of related disciplines providing complementary perspectives: philosophy, history, human geography, demography, statistics, law, psychology, etc. These disciplines are systematically looked at with regard to their relationships to the social sciences.

During the bachelor period, students follow units progressively building up their knowledge of the theory and methodologies used in sociology and anthropology and specific subjects belonging to these two disciplines. Exercises associated with theoretical thinking and fieldwork are organised during the first year. The intention of this programme is to give priority to learning the use of both quantitative and qualitative methodologies in social sciences.

Last but not least, language lessons are provided throughout the programme.
