The lectures will be followed remotely, and the practical courses will take place in the laboratories of ULB in Gosselies or of UMONS. This Master focuses on the molecular and cellular understanding of organisms, both unicellular and multicellular. This programme covers many areas of life sciences such as biochemistry, cell biology, genetics, microbiology and molecular biology. In addition, this Master specifically addresses techniques related to molecular imaging.

## Programme's added value

The ULB-UMONS Master in Biochemistry and Molecular and Cell Biology will allow:

- > To build, develop and maintain knowledge in this field and its related disciplines;
- > To act as a scientific actor for the resolution of complex problems;

## Teaching methods
