## Programme objectives

More generally, the programme also gives students key skills for their future careers: coherent and well-structured oral and written expression, the ability to retrieve and manage information, and language skills—which are a key aspect to finding a job. Students are regularly encouraged to read English documents, and a number of courses are taught in English.

With skills tailored to the business world, graduates have great opportunities on the job market and can quickly find interesting work where they will make the most of their education.

## Programme's added value

Our aim is to provide high-level academic training while preparing students for their professional career. ULB's political science programme also benefits from the pooling of a significant number of courses with the Institute of European Studies, one of the best in Europe.

- › A very wide offering of courses in political science, and many more in related areas of human sciences (law, economics, history, sociology, psychology, statistics). Recent results from a student survey as part of our evaluation process are very encouraging, with 84% of courses given positive marks.

- › An excellent academic programme with teachers of international renown: For the fourth year running, SciencePo-ULB was among the top 100 political science departments worldwide; it is the highest ranking in Belgium, and in the top 5 worldwide for French-speaking political science departments (QS World university Ranking by subject, 2017).
- › Strong emphasis on linguistic and methodological skills.
- › Preparation for the professional world.
- › Immersion in an international environment.
