Programme objectives

The Master in Labour Studies in cooperative education trains specialists in labour organisation and management. The programme is in direct contact with the professional world, with a cooperative structure that enables students to learn while experiencing the reality of the labour market and learning practical skills. Theoretical and practical classes are pluridisciplinary in nature, as they tackle labour issues from a legal, sociological, psychological, economic, and social perspective.

Programme’s added value

Theoretical and practical courses are given as evening and weekend classes on the Charleroi-Ville Haute campus, which enables students to be present in their company or organisation during regular office hours.

Students in the Master in Labour Studies in cooperative education earn both professional experience and a Master's degree, both of which are essential to enter and remain on the labour market.
