

Bachelor in Bioengineering

The teaching covers four areas

- > A general background in sciences: mathematics, chemistry, physics, biology (general, zoology and botany), informatics;
- > Engineering sciences: transport phenomena, applied thermodynamics, electricity and electronics, chemical engineering, modeling;
- > Bioengineering sciences: agronomy, biochemistry and molecular biology, earth and soil science, environmental technologies
- > Humanities, in particular languages and an optional course in epistemology and business economics

The courses are taught ex cathedra and through the implementation of concrete projects. About half of the teaching volume consists of projects, exercises and laboratory work. The other half consists of theoretical teaching. Excursions are organized as well.
