

# Master in Anthropology

## Focus Professional

The Master in Anthropology trains specialists on a comparative approach to various societies and cultures, and on field research. It provides students with the analytical skills required to reflect on life within a society.

The programme starts by developing the foundations laid down during the Bachelor, and by offering regional or specialised anthropological courses as well as courses that borrow from other disciplines (sociology, history, psychology, philosophy, political science, etc.).

A special feature of the Master in Anthropology is that it is largely organised around the dissertation students produce at the end of the programme. Students choose a research topic at the beginning of the Master, in agreement with a supervisor of their choosing. This means the Master in Anthropology places emphasis on training through research, allowing students to acquire a range of skills associated with the design and implementation of an empirical field research project, from defining a methodology and producing data to writing the dissertation.
