

# Master in Management of Cultural Sector

## Focus Professional

The main subjects of the Master in Cultural Studies and Management are: the **management of cultural institutions and companies; knowledge** of arts and culture; the **sociology** of arts and culture; **marketing** in the field of arts and culture; cultural **policies**; and **law** applied to artists and cultural organisations.

Particular emphasis is placed on **management**: in order to work autonomously and responsibly, students must have considerable knowledge of the subjects involved: art history, law, accounting, marketing, communication, etc. This is why classes are given by academics who are specialists of these subjects.

**Practice** is also important in this programme, which teaches about practical aspects of various professions:

- valuable immersive **work placements** will put students in contact with all types of cultural institutions both in Belgium and abroad;
- by attending **seminars** hosted by professors and assistants, and by working on their dissertation, students will have the opportunity to complete an **artistic or cultural project**, from design to implementation, whether alone or in teams.

The dissertation lets students develop a critical view of the cultural sector at a national or international scale, both in terms of management and public policy.
