

Master de spécialisation interdisciplinaire en études européennes

This advanced program brings together one core module (25 credits), three elective tracks (20 credits) as well as the professionalization module/mobility at the University of Waseda (15 credits).

The core module (25 credits) includes a set of courses that deal with fundamental topics in EU studies, including: EU law, decision-making at the EU level, history of European integration and European economic governance. These courses provide the students with the necessary academic knowledge to engage in the elective courses and modules. During this core module, students also have the opportunity to follow a course with a **guest professor from the University of Oxford or the University of Cambridge**.

Depending on their needs and professional ambitions, students can choose among **three elective specialization tracks** (20 credits each):

- > **Economic Governance and Policies in the EU (module 1),**
- > **Migrations, Rights and Policies (module 2)**
- > **EU integration, Regionalism and Global Governance (module 3).**

Each module follows an interdisciplinary approach, as it addresses key topics in EU studies from the perspectives of political science, law, history and economics. Professors from these disciplines interact in each module, providing a comprehensive and interdisciplinary understanding of the EU in these three main areas.

The uniqueness of this Master program lies in its focus on **career development** or the **mobility at the University of Waseda** (15 credits). Students can choose one of the following paths:

- > **Internship and career development:** An innovative seminar is organised in the module **'Final Dissertation (Internship Report), Internship and Career Development' (15 credits)** to offer students the necessary skills to develop a professional project and a career plan. Internship is compulsory. Students have to write a final dissertation (15 credits) based on the professional experience acquired through the internship and the compulsory seminar on career development. To allow students to follow courses and devote sufficient time to their professional plan, internships can only take place from April to September (the minimum duration of the internship is 192 hours).
- > **Mobility:** This Master benefits from a memorandum of understanding with the Graduate School of Asia Pacific Studies (GSAPS) which includes **an annual student exchange program allowing students to study during the second term** at the **University of Waseda**, Tokyo, Japan (15 credits).

Année unique | MS-EURI
